PayPal™ Access

Integration Requirements

- Linux-based web server
- PHP 5 (or greater)
- Permissions to make changes in your document root

Installing the PayPal Access Integration Assistant

1) Download the Integration Assistant zip file from here:
   https://www.x.com/sites/default/files/webform/identity/openid_simple.zip
2) Unzip it into your document root.
3) Launch the Integration Assistant by opening the "ppa-assistant.php" file in a browser.
4) Follow the directions presented by the Integration Assistant to integrate PayPal Access into your web application.

Trouble-shooting

Please consult the README in the zip file for the latest version of our troubleshooting guide.
